EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jennifer Bush on 7/18/2008.

The application has been amended as follows:

9. (Currently Amended) ~~An apparatus for direct annotation of objects, the apparatus~~
A computer program product having a computer-readable storage medium storing computer-executable code for direct annotation of objects, the code comprising:

a media object storage for storing media, annotation objects, a plurality of different visual notations each comprising a text or a graphic image and a plurality of corresponding audio signals;

- a direct annotation creation module coupled to receive an audio signal, a selected visual notation from the plurality of different visual notations and a reference to a location within an image, the direct annotation creation module, in response to receiving the audio signal or the reference to the location within the image, automatically creating an annotation object, independent of the image, that associates the audio signal, the selected visual notation and the location, and the direct annotation creation module storing the audio annotation in the media object storage;
- an audio vocabulary comparison module coupled to the media object storage and the direct annotation creation module, the audio vocabulary comparison module receiving audio input and finding a corresponding one of the plurality of different visual notations that matches content of the audio input; and
- an annotation output module coupled to the direct annotation creation module, the annotation output module generating audio or visual output in response to user selection of an annotation symbol representing the annotation object.

The following is an examiner's statement of reasons for allowance: The prior art of record is silent in teaching a display apparatus for displaying images, and annotating the images using a coupled audio input device with a corresponding reference location within an image on the display, and automatically creating an annotation object that

Art Unit: 2174

associates the input audio signal, the location, and a visual notation. The visual notation is chosen by comparing the audio input of the annotation to a stored vocabulary, if a match is found, the notation is the chosen as a representative of the content of the audio input, along with all of the other limitation of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
